Digital Health: Evidence into Practice

Translating health research into connected care, diagnostics and better patient outcomes.

2025-11-18 · 58 pages

Executive summary

Translating health research into connected care, diagnostics and better patient outcomes. The analysis draws on ecosystem indicators, stakeholder consultation and international comparison to identify practical priorities for research, industry and government partners.

Key findings

Collaboration between universities, research centres and enterprises is strengthening. Talent pipelines, shared infrastructure and access to early-stage funding remain decisive factors in converting research into measurable national impact.

Recommendations

Align funding with national priorities, expand industry-academia partnerships, invest in specialised research skills and establish common indicators so progress can be tracked consistently across the ecosystem.
